WEB DEVELOPMENT ACTIVITY-BASED LEARNING

Consolidated Report — Three Selected Case Studies

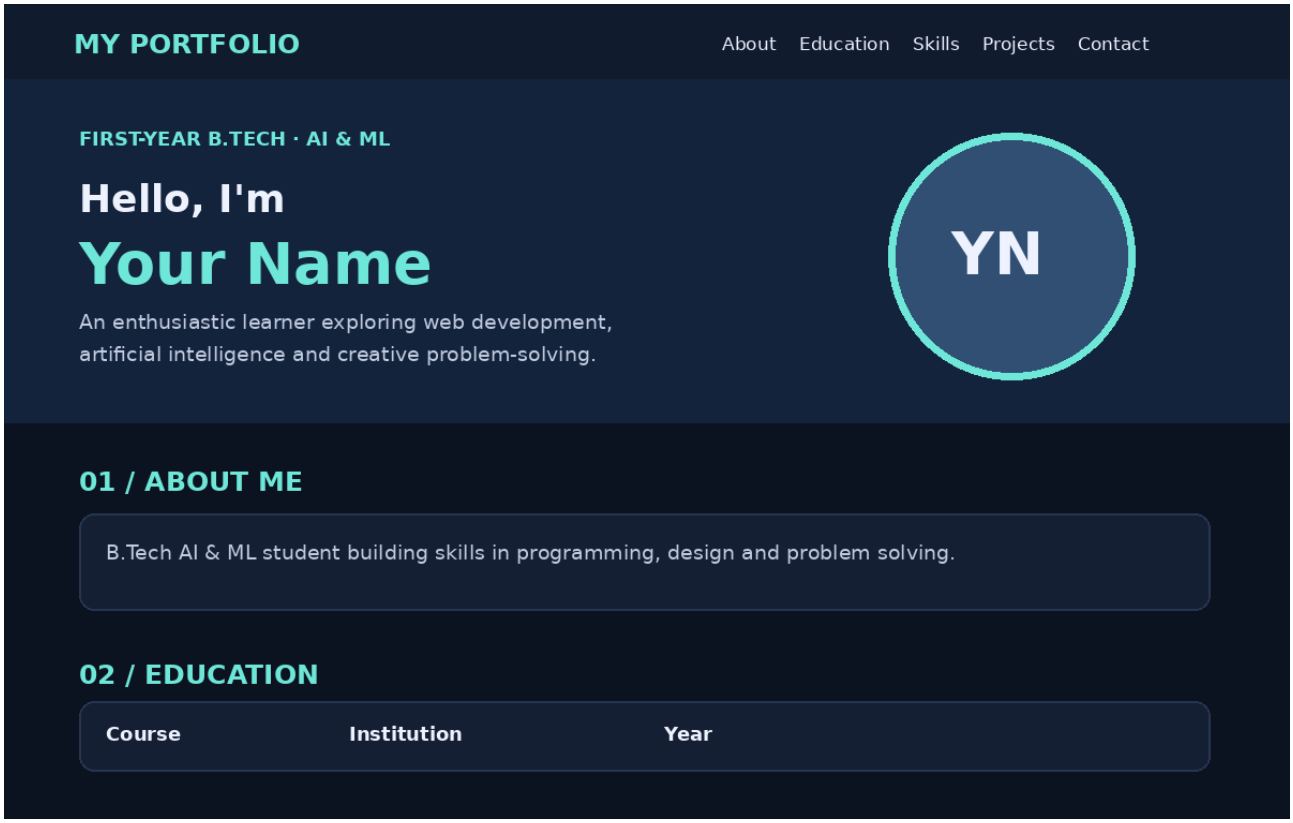

Student Name	[Enter your name]
Roll Number	[Enter roll number]
Branch	B.Tech AI & ML
Section	[Enter section]

Assignment Objective

Design and develop three webpages selected from the Web Development Activity-Based Learning case-study list. The pages use HTML and CSS and demonstrate responsive layouts, navigation, content cards, tables and form controls where appropriate.

Case Study 1 — Personal Portfolio Website

Purpose: Present a student profile, career introduction, education, technical skills, projects, certifications, strengths and contact details. The design uses a dark theme, responsive navigation, cards and an education table.

Case Study 2 — College Information and Admissions Website

Purpose: Present institutional information, course categories, campus facilities, admission steps and an enquiry form. The page includes a navigation bar, banner, information cards and a responsive layout.

Case Study 3 — Fitness Center and Gym Website

Purpose: Display workout programmes, trainer profiles, membership plans, a weekly class schedule and a registration/callback form. The visual design uses bold typography, contrasting colours, cards and hover effects.

Implementation Summary

Feature	Portfolio	College	Gym
Responsive layout	Yes	Yes	Yes
Navigation links	Yes	Yes	Yes
Cards / content sections	Yes	Yes	Yes
Tables	Education	—	Class schedule
Form controls	Email link	Enquiry form	Membership form
CSS hover effects	Yes	Yes	Yes

Before Submission

• Replace all placeholder student details (name, roll number, section, email and phone).

• Verify or replace sample college information and example gym prices.

• Open all three index.html files in a browser and check navigation and forms.

• Capture fresh screenshots of the final pages and include them in this report if your faculty expects actual browser screenshots.

• Create a GitHub repository named WD-Activity-Based-Learning and upload the three folders, README.md and consolidated report PDF.

• Submit the repository URL to the Web Development faculty member / Lab Mentor on the first working day after the holidays.

Note: The preview images in this report are visual summaries of the page designs. The HTML pages are the working project files. Demo forms display a confirmation message but do not save or transmit information.
